

BROOKHAVEN HOSPITAL'S

2012 Outcome

Validation Study Highlights

Highlights from Brookhaven Hospital's Outcome Validation Study 2012

Since 1997 Brookhaven Hospital has conducted an Outcome Validation Study that evaluates the performance and quality of its clinical treatment programs and measures the level of customer satisfaction. The following pages contain highlights from the 2012 Outcome Validation Study; it provides an overview of Brookhaven Hospital's performance as a healthcare provider.

As the data indicates, Brookhaven Hospital has maintained a solid record of quality care and continues to provide a beneficial experience to its patients. We hold the results of this study as a valuable indicator of our past successes and as a tool that allows us to target areas for future improvement.

Brookhaven Hospital is dedicated to providing effective treatment for mental health conditions. Our Outcome Validation Study is just one example of our commitment to our clients and their families.

Brookhaven Hospital's 2012 Customer Satisfaction Results

94% average

During my stay, I participated in a boundaries group related to my rights

94% average

➤ The results indicate a reliable pattern of patient satisfaction with treatment received at Brookhaven Hospital.

Brookhaven Hospital's 2012 Customer Satisfaction Results

Brookhaven's Customer Satisfaction Survey is conducted at different intervals during a patient's stay. The survey rates an individual's satisfaction with various service and program categories. Over the past fourteen years, Brookhaven Hospital has consistently demonstrated a strong ability to meet and exceed the expectations of our clients.

From January 1, 2012 to December 31, 2012, 96% of our patients said that they would recommend Brookhaven's programs to others in need of treatment.

Brief Symptom Inventory (BSI) Results

The Brief Symptom Inventory (BSI) is used by Brookhaven to measure its effectiveness in treating psychological conditions. The lower the BSI score, the less distress an individual feels. Statistics reveal that a consistent majority of patients at Brookhaven Hospital experience clinically significant improvement during their stay.

Year	2007	2008	2009
Average at Admission GSI	74.23	75.41	74.62
Average Discharge GSI	60.70	63.06	62.14
Improvement from Admission to Discharge	74.23	12.34	12.49
Year	2010	2011	2012
Average at Admission GSI	74.77	76.05	75.48
Average Discharge GSI	61.70	61.68	61.29
Improvement from Admission to Discharge	13.08	14.55	14.19

Note: A T-Score of 62.00 or above on three of the nine subscales of the BSI, constitutes "caseness," which refers to a score consistent with the criteria for inpatient hospitalization.

Patient Re-Admission Within 30 Days of Discharge

Per 1000 Patient Days

Lasting Results

By assessing and studying the rate of re-admission, we are able to measure the durability of our programs and services. While there are some seasonal fluctuations, Brookhaven patients achieve results that enable them to return to their lives.

Consistent Quality Care

Brookhaven Hospital provides a safe, inviting atmosphere that promotes emotional well-being by offering a consistent level of quality care. The result is a lasting experience that empowers our patients to live productive lives.

Exceeding Expectations

Data from the 2012 Outcome Study reflects Brookhaven Hospital's consistent success at maintaining a low re-admission rate, well within benchmark parameters. The rate of re-admission per 1000 patient days that we compare ourselves to is 10.63. Our re-admission rate in 2012 was 2.91 per 1000 patient days.

Patient Re-Admission Within 30 Days of Discharge

March 2010
